

R Series - Compact Gutter Vacuum

* Metal drum clamps

* Large 72mm metal inlet ensures clog free operations and compatibility with all G force systems

* Dry use Hepa Filter

* Interchangeable filters allow working in all conditions

* Wet use sponge filter

* High powered 1700W two stage motor

* Semi circular float system shield made from Tungsten Steel protects the filters increasing their lifespan

* The universal 72mm side inlet guides airflow and removes waste in a spiral around the drum and motor, collecting effectively at the bottom.

* Locking wheels for stable use
